Product Overview

Mini-Circuits' EDC10-183+ is a 10 dB directional coupler that operates from 6 to 18 GHz packaged in MCLP 4 x 4mm, 24-lead package. It provides excellent coupling flatness over a broad bandwidth and good return loss. This coupler also provides a quadrature phase shift between the signal at the through port and coupler port. Manufacturing using GaAs Technology, this model results in relatively high repeatability in performance.

Key Features

Feature	Advantages
Wideband, 6-18 GHz	EDC10-183+ can be used in many applications, saving component count. Also ideal for wide-band applications such as military and instrumentation.
Excellent coupling flatness	Excellent coupling flatness yields higher accuracy.
Small size, 4x4 MCLP package.	Tiny footprint saves space in dense layouts while providing low inductance, repeatable transitions, and excellent thermal contact to the PCB.
