Flexible Test Cable

FLC-2M-SMNM+

50Ω DC to 18 GHz

The Big Deal

- Ultra-wideband, DC to 18 GHz
- Minimal performance change versus flexure
- Low loss

CASE STYLE: MU2339

Product Overview

Mini-Circuits' FLC-2M-SMNM+ flexible test cable provides ultra-wideband performance from DC to 18 GHz with low insertion loss and excellent VSWR. Specially designed for outstanding stability of phase and insertion loss versus flexure, this cable is ideal for demanding lab environments where crowded layouts and frequent bending are common. It features SMA-M to N-M stainless steel connectors and rugged cable construction with protective shield and strain relief for excellent durability.

Key Features

Feature	Advantages
Ultra-wideband, DC to 18 GHz	Supports a wide range of test applications including R&D, military and defense, production test and more.
Excellent stability of phase and insertion loss versus flexure	The FLC-2M-SMNM+ has been tested in bend radii as tight as 2.4 inches to qualify minimal change in insertion loss, insertion phase, and VSWR, providing reliable performance in a wide range of configurations.
Low insertion loss	Allows accurate measurement with minimal compensation for the effects of the cable connection.
Performance qualified to 20,000 flexures	Like all Mini-Circuits test cables, the FLC-2M-SMNM+ has been performance qualified up to 20,000 bend cycles, ensuring outstanding durability and extra long life.
