Product Overview

Mini-Circuits' ZHL-2-8+ is a medium-power connectorized amplifier providing 34 dB gain and +30 dBm P3dB across the 10 to 1000 MHz frequency range. Excellent gain flatness across its entire frequency range (± 0.8 dB) makes it ideal for systems where consistent performance across frequency is required. The amplifier operates on a 24V DC supply and comes housed in compact aluminum alloy case (4.75 x 2.00 x 2.12") with SMA connectors and an optional heat sink for efficient cooling.

Key Features

Feature	Advantages					
Wideband, 10 to 1000 MHz	Supports a broad range of system and test lab applications.					
High gain, 34 dB	Reduces the number of gain stages, lowering component count and overall system cost.					
Excellent gain flatness, ±0.8 dB	Provides consistent performance across frequency, minimizing the need for external equalizing networks in wideband applications.					
High output power, +30 dBm P3dB	Supports a wide range of high power applications.					
High OIP3, +42 dBm	Provides highly linear performance with excellent sensitivity and two-tone spur-free dynamic range.

Open load is not recommended, potentially can cause damage. With no load derate max. input power by 20 dB.

 $\ensuremath{{}^{\blacktriangle}}\xspace$ Heat sink not included. Alternative heat sinking and heat removal must be provided by the user to limit maximum base-plate temperature to 65°C, in order to ensure proper performance. For reference, this requires thermal resistance of user's external heat sink to be 1.5°C/W max.
