ow Pass Filter

LFCG-1575+

 50Ω DC to 1575 MHz

The Big Deal

- Very good rejection, 50 dB typical
- Rugged, ceramic construction
- Tiny size, 0.079 x 0.049 x 0.037" (0805)
- Excellent power handling, 5W

CASE STYLE: GE0805C-2

Product Overview

Mini-Circuits' LFCG-1575+ is an LTCC low pass filter with a passband from DC to 1575 MHz, supporting a variety of applications. This model provides 0.9 dB typical passband insertion loss and provides a very good stopband rejection due to strategically constructed layout with minimal interaction between components. It handles up to 5W RF input power and provides a wide operating temperature range from -40°C. to 85°C. Housed in a tiny 0805 ceramic form factor with wraparound terminations, the filter is ideal for dense PCB layouts and with minimal performance variation due to parasitics.

Kev Features

Feature	Advantages				
Very good stopband rejection, 50 dB typical	The LTCC lowpass filter provides a very good stopband rejection until 12 GHz suitable for high enapplications.				
LTCC Construction	Provides repeatable performance in a rugged, ceramic package well suited for tough environments such as high humidity and temperature extremes.				
Tiny size (0.079 x 0.049 x 0.037")	Saves space in dense circuit board layouts and minimizes the effects of parasitics.				
High power handling, 5W	Supports a wide range of system power requirements.				
Wrap-around terminations	Provides excellent solderability and easy visual inspection				

A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.

B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.

C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Puchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.minicircuits.com/MCLStore/terms.jsp

Features

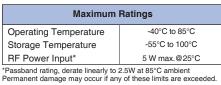

- · Low loss, 0.9 dB typical
- High rejection 50 dB typical
- · Excellent power handling, 5W
- Extremely small size 0805 (2.0 x 1.25 mm)
- Temperature stable
- LTCC construction

Applications

- Harmonic Rejection
- VHF/UHF transmitters / receivers
- Lab use
