Product Overview

LHA-13HLN+ (RoHS compliant) is an advanced wideband amplifier fabricated using E-PHEMT technology and offers extremely high dynamic range over a broad frequency range and with low noise figure. In addition, the LHA-13HLN+ has good input and output return loss over a broad frequency range. LHA-13HLN+ is enclosed in a 3mm x 3mm, 12-lead MCLP package and has very good thermal performance.

Key Features

Feature	Advantages
Broad Band: 1MHz to 1GHz	Broadband covering primary wireless communications bands: VHF, UHF, Cellular
Extremely High IP3 38.1 dBm typical at 1 MHz 43.3 dBm typical at 0.5 GHz	The LHA-13HLN+ matches industry leading IP3 performance relative to device size and power consumption. The combination of the design and E-PHEMT Structure provides enhanced linearity over a broad frequency range as evidence in the IP3 being approximately 12-16 dB above the P1dB point. This feature makes this amplifier ideal for use in: • Driver amplifiers for complex waveform up converter paths • Drivers in linearized transmit systems • Secondary amplifiers in ultra-High Dynamic range receivers
Low Noise Figure 1.2 dB at 0.5 GHz	Enables lower system noise figure performance and along with High OIP3 provides high dynamic range
High P1dB, 28 dBm at 0.5 GHz	High P1dB, High OIP3, Low NF results in a very dynamic range preventing amplifier saturation under strong interfering signals.
