|                             |                                                 |
|-----------------------------|-------------------------------------------------|
| Description                 | Termination with IP67 rating                    |
| Frequency Range             | DC-6 GHz                                        |
| Impedance                   | 50 Ohms nominal                                 |
| VSWR                        | 1.1:1 maximum DC-2 GHz<br>1.2:1 maximum 2-6 GHz |
| RF Input Power              | 2 Watts average                                 |
| RF Connector                | SMA, TNC, or N (male or female)                 |
| Environmental               | IP67 rated                                      |
| Operating Temperature Range | -55°C to +100°C                                 |
| Physical Size               | See outline drawing 092-8886                    |
