

Waveguide Crossguide Coupler, Q Band, 40 dB

Description:

Model SWX-35345340-22-4B is a four-port, split block crossguide coupler that is offered for power sampling where directivity is of concern. Compared to a multi-hole directional coupler, crossguide couplers offer lower insertion loss and a smaller form factor and insertion length. This model operates between 35 to 45 GHz with a 40 dB typical coupling level, 0.5 dB nominal insertion loss, and 15 dB typical directivity. The input, output, and coupled ports are all WR-22 waveguides with UG-383/U flanges.

Features:

- Low Insertion Loss
- Moderate Directivity
- Four Port Configuration

Applications:

- Test Labs
- Test Instrumentation
- Sub-assemblies
