

High Dynamic Range Electrical Attenuator, E Band

Description:

Model SKA-6039033030-1212-A1 is an E-Band, PIN diode based electrical attenuator. The attenuator exhibits 2.5 dB typical insertion loss and 30 dB nominal attenuation across the frequency range of 60 to 90 GHz. The control voltage of the standard model is 0 to -5 V_{DC} with a typical current draw of 5 mA. However, the attenuator can also be configured with positive control voltage from 0 to +5 V_{DC}. The control speed of the attenuator can go up to 100 ns. The RF input and output ports are WR-12 waveguides with UG-387/U flanges, and a female SMA coaxial connector provides the control signal.

Features:

- Low Insertion Loss
